## Comparable Measures (NON-GAAP)

Comparable measures are provided because management uses this information in evaluating the results of the core operations of the Company and/or internal goal setting. In addition, the Company believes this information provides investors valuable insight on underlying business trends and results in order to evaluate year-over-year financial performance. As such, the following items, when appropriate, are excluded from comparable results

## Acquisitions, Divestitures, and Related Costs

Acquisitions, divestitures, and related costs includes transaction and associated costs in connection with pending and completed acquisitions, investments, and divestitures. In addition, in connection with acquisitions, the allocation of purchase price in excess of book value for certain inventory on hand at the date of acquisition is referred to as inventory step-up. Inventory stepup represents an assumed manufacturing profit attributable to the acquired company prior to acquisition. For inventory produced and sold after the acquisition date, the related manufacturer's profit accrues to the Company.

## Restructuring and Other Strategic Business Development Costs

Restructuring and other strategic business development costs consist primarily of costs recognized by the Company in connection with certain activities which are intended to simplify, streamline, or increase efficiencies. These costs include restructuring charges, such as employee termination benefit costs, contract termination costs, costs to consolidate or close facilities and relocate employees, and other costs which are not reflective of the core operations of the Company related to strategic business development initiatives.

## Other

Other includes items that are not specifically related to acquisitions and divestitures or restructuring and other strategic business development costs (e.g. unrealized net (gain) loss on securities measured at fair value, loss on extinguishment of debt, impairment of assets, loss on contract termination, and net (gain) loss from the mark to fair value of undesignated commodity derivative contracts prior to settlement).

Comparable Basis Earnings before Interest and Taxes ("Comparable Basis EBIT"), as used by the Company, means operating income plus equity in earnings (loss) of equity method investees, both on a comparable basis. Comparable Basis EBIT is considered a performance measure and the Company considers operating income the most comparable GAAP measure. Comparable Basis EBIT is used by management in evaluating the results of the core operations of the Company including, the results of its equity method investments. In addition, the Company believes this information provides investors valuable insight on underlying business trends and results in order to evaluate year-over-year financial performance.

The Company has disclosed its debt to Earnings before Interest, Taxes, Depreciation, and Amortization ("EBITDA") ratio and net debt to EBITDA ratio. These are non-GAAP financial measures that management believes are of interest to investors and lenders in relation to the Company's overall capital structure and its ability to borrow additional funds. The Company considers EBITDA a measure of liquidity and considers net cash provided by operating activities the most comparable GAAP measure.

Free cash flow as used by the Company means the Company's net cash flow from operating activities prepared in accordance with GAAP less capital expenditures for property, plant, and equipment. Free cash flow is considered a liquidity measure and provides useful information to investors about the amount of cash generated, which can then be used, after required debt service and dividend payments, for other general corporate purposes. A limitation of free cash flow is that it does not represent the total increase or decrease in the cash balance for the period. Free cash flow should be considered in addition to, not as a substitute for, or superior to, cash flow from operating activities prepared in accordance with GAAP.

## Diluted weighted average common shares outstanding

Effective March 1, 2018, we adopted the FASB amended guidance regarding the recognition of revenue from contracts with customers using the retrospective application method. Accordingly, financial information for fiscal year 2017 and fiscal year 2018 presented herein has been adjusted to reflect the adoption of this amended guidance. Periods prior to fiscal year 2017 have not been adjusted to reflect the adoption of this amended guidance as the impact is not deemed material.
${ }^{\text {2) }}$ Includes impairment of intangible assets of $\$ 8.4$ million for the year ended February 28,2017
3) Includes gain on sale of business of $\$ 4.3$ million for the six months ended August 31,2020
4) May not sum due to rounding as each item is computed independently.

Comparable Diluted Net Income (Loss) Per Common Share Attributable to CBI may not sum as comparable amounts are calculated on a fully diluted basis and Reported Diluted Net Income (Loss) Per Common Share Attributable to CBI may be calculated excluding issuable shares the effect of including these would have been anti-dilutive

| ${ }^{(1)}$ In connection with the adoption of the FASB amended guidance regarding the recognition of revenue from contracts with customers, we recorded a deferred tax asset to align the timing of when we recognize sales incentive expense and revenue. The December 2017 enactment of the Tax Cuts and Jobs Act ("TCJ Act") resulted in a reduction of that asset and additional provision for income taxes which was recognized in the Fourth Quarter 2018 and Fiscal Year 2018 periods. This additional provision for income taxes is included in our comparable adjustment for the impact of the TCJ Act and reflected within the Revenue Recognition Adjustments column. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
